

Navigo[®]

Interactive Touchscreen Solutions, Inc. is a leading provider of touchscreen wayfinding and informational kiosk systems. We offer high-end, sophisticated solutions including free-standing cabinetry, weather-resistant kiosks for outdoor use and wall-mounted units for buildings with limited space. All ITS standard enclosures and cabinetry are fully ADA compliant.

Please contact ITS at 1-800-652-4830 to learn more about our custom enclosures and cabinetry options.

CIPHER

The CIPHER exterior enclosure houses Flat Panel monitors up to 18" and is fabricated in aluminum and steel. The CIPHER offers a tall slim design that will seamlessly integrate anywhere around campus. A protected bulletin slip panel can also be placed directly underneath the monitor to further navigate your visitors around campus.

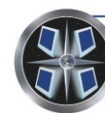

MARQUIS

The MARQUIS exterior enclosure houses Flat Panel monitors up to 18". The MARQUIS is fabricated in aluminum and steel making a durable kiosk solution that is able to withstand rain, snow and wind. With a touchscreen on one side and protected bulletin slip panels on the 3 other sides, the MARQUIS is the one-stop source of directory information for any campus.

QUANTUM

The QUANTUM exterior enclosure houses Flat Panel monitors up to 18" and is fabricated in aluminum and steel. The QUANTUM's unique design allows customers to choose from a variety of finishes that will add to the facilities aesthetic appeal. Protected bulletin slip panels can be placed on both sides of the enclosure as requested.
